CONTENTS.

PAPERS COMMUNICATED TO THE CHEMICAL SOCIETY.

PAGE

I.—A Study of the Dynamic Isomerism of Thiourea and Ammonium Thiocyanate. The Volumetric Determination of Thiourea by means of Iodine. By J. Emerson Reynolds, M.D., Sc.D., F.R.S., and Emil A. Werner, F.I.C. . . . 1

II.—The Synthesis of *aa*-Dimethylglutaric Acid, of *β*-Hydroxy-*aa*-dimethylglutaric Acid, and of the *cis*- and *trans*-Modifications of *aa*-Dimethylglutaconic Acid. By W. H. Perkin, jun., and Alice E. Smith, B.Sc. (1851 Exhibition Scholar of University College, Bangor) 8

III.—Note on the Action of Barium Hydroxide on Dimethylvioluric Acid. By Martha Annie Whiteley . . . 18

IV.—The Oxime of Mesoxamide and some Allied Compounds. Part II. Disubstituted Derivatives. By Martha Annie Whiteley 24

V.—The Vapour Pressures and Boiling Points of Mixed Liquids. Part II. By Sydney Young, D.Sc., F.R.S., and Emily C. Fortey, B.Sc. 45

VI.—The Vapour Pressures and Boiling Points of Mixed Liquids. Part III. By Sydney Young, D.Sc., F.R.S. . . . 68

VII.—Note on Mixtures of Constant Boiling Point. By Sydney Young, D.Sc., F.R.S. 77

VIII.—The Action of Metallic Thiocyanates on Carbonyl Chloride. By Augustus Edward Dixon, M.D. . . . 84

IX.—Studies in the Camphane Series. Part X. The Constitution of Enolic Benzoylcamphor. By Martin Onslow Forster 98

X.—Action of Phosphorus Haloids on Dihydroresorcins. Part I. Dimethyldihydroresorcin. By Arthur William Crossley and Henry Rondel Le Sueur 110

XI.—A Reaction of some Phenolic Colouring Matters. Part II. By Arthur George Perkin, F.R.S.E., and Charles Richard Wilson, B.Sc. 129

XII.—Interactions of Ketones and Aldehydes with Acid Chlorides—the Formation of Benzoxyolefines and 1-Benzoxycamphene. By Frederic Herbert Lees 145

XIII.—Nitrotartaric Acid and some of its Ethereal Salts. By Percy Faraday Frankland, Henry Leonard Heathcote, B.Sc., and Hilda Jane Hartle, B.Sc. 154

1865

PAGE

XIV.—The Nitration of Diethyl Monobenzoyl and Mono-*p*-toluyl Tartrates. By PERCY FARADAY FRANKLAND, HENRY LEONARD HEATHCOTE, B.Sc., and CLARENCE JAMES GREEN, B.Sc. 168

XV.—The Hydrates and the Solubility of Barium Acetate. By JAMES WALKER and WILLIAM A. FYFFE 173

XVI.—The State of Carbon Dioxide in Aqueous Solution. By JAMES WALKER 182

XVII.—Qualitative Separation of Arsenic, Antimony, and Tin. By JAMES WALKER 184

XVIII.—A Reagent for the Identification of Urea and of Certain other Nitrogen Compounds. By HENRY J. HORSTMAN FENTON, F.R.S. 187

XIX.—Note on the Action of Acids on Cellulose. By MILDRED GOSTLING, B.Sc. 190

XX.—Purpurogallin. I. By ARTHUR GEORGE PERKIN, F.R.S.E., and ALEC BOWRING STEVEN, B.Sc. (Lond.) 192

XXI.—The Combination of Carbon Monoxide with Chlorine under the Influence of Light. By GIBSON DYSON and ARTHUR HARDEN 201

XXII.—The Rate of Decomposition of Diazo-compounds. Part II. Diazo-compounds of the Naphthalene Series. By JOHN CANNELL CAIN and FRANK NICOLL 206

XXIII.—The Absorption Spectra of Metallic Nitrates. Part II. By WALTER NOEL HARTLEY, D.Sc., F.R.S. 221

XXIV.—Phenocycloheptene. By FREDERIC STANLEY KIPPING and ALBERT E. HUNTER 246

XXV.—Researches on Silicon Compounds. Part VIII. Interactions of Silicophenylamide and Thiocarbimides. By J. EMERSON REYNOLDS, M.D., Sc.D., F.R.S. . . . 252

XXVI.—The Influence of Molybdenum and Tungsten Trioxides on the Specific Rotations of *l*-Lactic Acid and Potassium *l*-Lactate. By GEORGE GERALD HENDERSON and JAMES PRENTICE 259

XXVII.—Formation of Carbazoles by the Interaction of Phenols, in the Orthoketonic Form, with Arylhydrazines. By FRANCIS R. JAPP, F.R.S., and WILLIAM MAITLAND, B.Sc. . 267

XXVIII.—Dimorphism of α-Methylanhydracetonebenzil. By FRANCIS R. JAPP, F.R.S., and ARTHUR C. MICHIE, B.Sc. . 276

XXIX.—The Oxidation Products of the Methyl Homologues of Anhydracetonebenzil. By FRANCIS R. JAPP, F.R.S., and ARTHUR C. MICHIE, B.Sc. 279

XXX.—The Estimation of Ethyl Alcohol in Essences and Medicinal Preparations. By THOMAS EDWARD THORPE and JOHN HOLMES 314

PAGE

XXXI.—Carbon Monoxide as a Product of Combustion of the Bunsen Burner. By Thomas Edward Thorpe . . . 318

XXXII.—Synthesis of Imino-ethers. *N*-Ethyl, *N*-Methyl, and *N*-Benzyl Benzimino-ethers. By G. Druce Lander, D.Sc. . 320

XXXIII.—Tertiary Butylphenol. By Edward W. Lewis (Salters' Research Fellow) 329

XXXIV.—The Constitution of the Products of Nitration of Aceto-*m*-toluidide. By Julius B. Cohen and Henry D. Dakin 331

XXXV.—The Solubilities and Transition Points of Lithium Nitrate and its Hydrates. By Frederick George Donnan and Bryce Chudleigh Burt 335

XXXVI.—A New Vapour Density Apparatus. By John S. Lumsden, D.Sc., Ph.D. 342

XXXVII.—A New Form of Pyrometer. By John S. Lumsden, D.Sc., Ph.D. 349

XXXVIII.—The $\alpha\beta$-Dimethylglutaric Acids, and the Separation of *cis*- and *trans*-Forms of Substituted Glutaric Acids. By Jocelyn Field Thorpe and William J. Young . . . 351

XXXIX.—The Condensation of Phenyl Ethyl Ketone (Propiophenone) with Benzylideneacetophenone and of Acetophenone with Benzylidenepropiophenone. By Robert Duncombe Abell, Ph.D. (Leipzig), B.Sc. (Wales), 1851 Exhibition Scholar of the University College of North Wales, Bangor 360

XL.—A Synthesis of 1 : 3 : 5-Triphenyl-2 : 4-dimethylcyclopentane and of 1 : 3 : 5-Triphenyl-2-methylcyclopentane. By Robert Duncombe Abell, Ph.D. (Leipzig), B.Sc. (Wales), 1851 Exhibition Scholar of the University College of North Wales, Bangor 367

XLI.—The Action of Ammonia and Organic Bases on Ethyl Esters of Olefinedicarboxylic and Olefine-β-Ketocarboxylic Acids. By Siegfried Ruhemann 374

XLII.—Distillation of Chlorine Water. By Arthur Richardson, Ph.D. 380

XLIII.—A Series of Double Chromates. By Samuel Henry Clifford Briggs 391

XLIV.—The Chlorine Derivatives of Pyridine. Part VIII. The Interaction of 2 : 3 : 4 : 5-Tetrachloropyridine with Ethyl Sodiomalonate. By W. J. Sell, M.A., F.R.S., and F. W. Dootson, M.A., D.Sc. 396

XLV.—On Colour Changes observed in Some Cobalt Salts. By Walter Noel Hartley, D.Sc., F.R.S. 401

PAGE

XLVI.—The Molecular Rearrangement of *N*-substituted Iminoethers. By G. D. Lander 406

XLVII.—The Nature and Probable Mechanism of the Replacement of Metallic by Organic Radicles in Tautomeric Compounds. By G. D. Lander 414

XLVIII.—The Biological Method for Resolving Inactive Acids into their Optically Active Components. By Alex. McKenzie (Grocers' Company's Research Student) and Arthur Harden 424

XLIX.—The Constitution of Pilocarpine. Part IV. By Hooper Albert Dickinson Jowett 438

L.—Preparation and Properties of 1 : 4 (or 1 : 5)-Dimethylglyoxaline and 1 : 3-Dimethylpyrazole. By Hooper Albert Dickinson Jowett and Charles Etty Potter . . . 464

LI.—The Rate of Decomposition of Diazo-Compounds. Part III. The Temperature Coefficient. By John Cannell Cain and Frank Nicoll 470

LII.—The Catalytic Racemisation of Amygdalin. By James Wallace Walker 472

LIII.—Camphor-β-thiol. By T. Martin Lowry, D.Sc., and George C. Donington, M.A. 479

LIV.—Hydrolysis of Urea Hydrochloride. By James Walker and John K. Wood 484

LV.—Decomposition of Mercurous Nitrite by Heat. By Prafulla Chandra Rây and Jatindra Nâth Sen, M.A., Government of Bengal Research Scholar, Presidency College, Calcutta 491

LVI.—Action of Phosphorus Haloids on Dihydroresorcins. Part II. Dihydroresorcin. By Arthur William Crossley and Paul Haas 494

LVII.—Essential Oil of Hops. By Alfred C. Chapman . . 505

LVIII.—Studies in the Camphane Series. Part XI. The Dioximes of Camphorquinone and other Derivatives of *iso*-Nitrosocamphor. By Martin Onslow Forster 514

LIX.—Studies in the Camphane Series. Part XII. *aa*-Benzoylnitrocamphors and *aa*-Benzoyliodocamphor. By Martin Onslow Forster and Ernest Arthur Jenkinson, A.R.C.S. 537

LX.—The Composition of Caro's Acid. By Thomas Slater Price, D.Sc. 543

LXI.—Salts of a Mercaptoid Isomeric Form of Thioallophanic Acid, and a New Synthesis of Iminocarbaminethioalkyls. By Augustus E. Dixon, M.D. 550

LXII.—The Affinities of some Feebly Basic Substances. By John Kerfoot Wood 568

PAGE

LXIII.—Reversibility of Enzyme or Ferment Action. By Arthur Croft Hill, M.A., M.D. 578

LXIV.—The Constitution of Cotarnine. By James J. Dobbie, M.A., D.Sc., Alexander Lauder, B.Sc., and Charles K. Tinkler 598

LXV.—On the Relation between the Absorption Spectra and the Chemical Structure of Corydaline, Berberine, and other Alkaloids. By James J. Dobbie, M.A., D.Sc., and Alexander Lauder, B.Sc. 605

LXVI.—The Absorption Spectra of Laudanine and Laudanosine in Relation to their Constitution. By James J. Dobbie, M.A., D.Sc., and Alexander Lauder, B.Sc. 626

Annual General Meeting 629

Obituary Notices 650

LXVII.—The Absorption Spectra of Nitric Acid in Various States of Concentration. By Walter Noel Hartley, D.Sc., F.R.S. 658

LXVIII.—The Action of Alkalis on Cinnamic Acid Dibromide and its Esters. By John J. Sudborough and Kenworthy J. Thompson 666

LXIX.—The Diazo-reaction in the Diphenyl Series. Part I. On Dianisidine and 3 : 3′-Dichlorobenzidine. By John Cannell Cain 688

LXX.—The Mechanism of the Reduction of Potassium Dichromate by Sulphurous Acid. By Henry Bassett, jun., B.Sc., A.I.C. 692

LXXI.—The Velocity and Mechanism of the Reaction between Potassium Ferricyanide and Potassium Iodide in Neutral Aqueous Solution. By F. G. Donnan and R. Le Rossignol 703

LXXII.—The Action of Ammonia and Organic Bases on Ethyl Esters of Olefinedicarboxylic and Olefine-β-ketocarboxylic Acids. Part II. By Siegfried Ruhemann . . . 717

LXXIII.—Note on the Formation of the Di- and Hexa-methylammonio-cadmium Chlorides. By W. R. Lang, D.Sc. . 724

LXXIV.—The Relative Affinities of Polybasic Acids. By Harry Medforth Dawson 725

LXXV.—The Chemical Dynamics of the Reactions between Chlorine and Benzene under the Influence of Different Catalytic Agents and of Light. By Arthur Slator, M.Sc., 1851 Exhibition Scholar of the University of Birmingham . 729

LXXVI.—The Conditions of Decomposition of Ammonium Nitrite. By Victor Herbert Veley 736

LXXVII.—The Electrolytic Reduction of Pheno- and Naphthomorpholones. By Frederic Herbert Lees and Frank Shedden 750

PAGE

LXXVIII.—The Bases contained in Scottish Shale Oil. Part II. By FREDERIC CHARLES GARRETT and JOHN ARMSTRONG SMYTHE 763

LXXIX.—Imino-ethers Corresponding with Ortho-substituted Benzenoid Amides. By GEORGE DRUCE LANDER and FREDERICK TREVOR JEWSON, A.I.C. 766

LXXX.—The Synthesis of $\alpha\alpha\gamma$-Trimethylglutaric Acid, of the *cis*- and *trans*-Modifications of β-Hydroxy-$\alpha\alpha\gamma$-trimethylglutaric Acid, and of $\alpha\alpha\gamma$-Trimethylglutaconic Acid. By W. H. PERKIN, jun., and ALICE E. SMITH, B.Sc., 1851 Exhibition Scholar of University College, Bangor . . 771

LXXXI.—Hexamethyleneoctocarboxylic Acid and the *cis*- and *trans*-Modifications of Hexamethylenetetracarboxylic Acid (Hexahydropyromellitic Acid). By T. W. D. GREGORY and W. H. PERKIN, jun. 780

LXXXII.—Hydrocyanic Acid in Fodder-Plants. By J. C. BRÜNNICH 788

LXXXIII.—Isomeric Change in Benzene Derivatives. The Conditions Influencing the Interchange of Halogen and Hydroxyl in Benzenediazonium Hydroxides. By K. J. P. ORTON 796

LXXXIV.—Freezing Point Curves for some Binary Mixtures of Organic Substances, chiefly Phenols and Amines. By JAMES CHARLES PHILIP 814

LXXXV.—Sulphocamphylic Acid and the Isomeric α- and β-Camphylic Acids. By W. H. PERKIN, jun. 835

LXXXVI.—Isomeric partially Racemic Salts containing Quinquevalent Nitrogen. Part VIII. Resolution of the α-Modification of Hydrindamine Bromocamphorsulphonate. By FREDERIC STANLEY KIPPING 873

LXXXVII.—Isomeric partially Racemic Salts containing Quinquevalent Nitrogen. Part IX. Resolution of the β-Modification of *dl*-Hydrindamine *d*-Bromocamphorsulphonate. By FREDERIC STANLEY KIPPING 889

LXXXVIII.—Isomeric partially Racemic Salts containing Quinquevalent Nitrogen. Part X. The Four Isomeric Hydrindamine *d*-Chlorocamphorsulphonates $NR_1R_2H_3$. By FREDERIC STANLEY KIPPING 902

LXXXIX.—α-Amino-β-methylhydrindene. By FREDERIC STANLEY KIPPING and GEORGE CLARKE, A.I.C. 913

XC.—Isomeric Partially Racemic Salts Containing Quinquevalent Nitrogen. Part XI. Derivatives of *dl*-Methylhydrindamine and *dl-neo*-Methylhydrindamine. Isomeric Salts of the Type $NR_1R_2H_3$. By GEORGE TATTERSALL, B.Sc., and FREDERIC STANLEY KIPPING 918

PAGE

XCI.—Isomeric Compounds of the Type $NR_1R_2H_3$. By Frederic Stanley Kipping 937

XCII.—Nitrocamphor and its Derivatives. V. *sesqui*Camphorylhydroxylamine, a Product of the Spontaneous Decomposition of Nitrocamphor. VI. Camphoryloxime-anhydride. VII. β-Bromo-α′-nitrocamphor. β- and π-Bromocamphoryloximes. By T. Martin Lowry, D.Sc. . . 953

XCIII.—The Estimation of Arsenic in Fuel. By T. E. Thorpe, C.B., F.R.S. 969

XCIV.—The Electrolytic Estimation of Minute Quantities of Arsenic, more especially in Brewing Materials. By T. E. Thorpe, C.B., F.R.S. 974

XCV.—A Direct Method for determining Latent Heat of Evaporation. By James Campbell Brown, D.Sc. . . 987

XCVI.—Reactions involving the Addition of Hydrogen Cyanide to Carbon Compounds. By Arthur Lapworth . . . 995

XCVII.—Resolution of α-Benzylmethylacetic Acid. By Frederic Stanley Kipping and Albert Edward Hunter . . . 1005

XCVIII.—Notes on Ozone. Estimation, Solubility, and Interaction with Hydrogen Peroxide. By John Kenneth Harold Inglis, M.A., B.Sc., 1851 Exhibition Scholar . 1010

XCIX.—Some Physical and Chemical Properties of Strong Nitric Acid. By Victor Herbert Veley and John Job Manley 1015

C.—The Alkylation of Sugars. By Thomas Purdie, F.R.S., and James C. Irvine, Ph.D., D.Sc. 1021

CI.—Trimethyl α-Methylglucoside and Trimethyl Glucose. By Thomas Purdie, F.R.S., and Robert C. Bridgett, M.A., B.Sc., Berry Scholar in Science 1037

CII.—The Composition of so-called Elæomargaric Acid. By Tokuhei Kametaka 1042

CIII.—Phosphoric Amidines. By Robert Martin Caven . . 1045

CIV.—Crystallised Ammonium Sulphate and the Position of Ammonium in the Alkali Series. By Alfred Edwin Howard Tutton, D.Sc., F.R.S. 1049

CV.—The Slow Oxidation of Methane at Low Temperatures. Part II. By William A. Bone and Richard V. Wheeler 1074

CVI.—The Mechanism of Combustion. By H. E. Armstrong . 1088

CVII.—The Constituents of the Volatile Oil of the Bark of *Cinnamomum pedatinervium*, of Fiji. By Ernest Goulding, D.Sc., Lond. 1093

CVIII.—Sulphocampholenecarboxylic Acid. By Alfred W. Harvey and Arthur Lapworth 1102

PAGE

CIX.—Optically Active Esters of β-Ketonic and β-Aldehydic Acids. Part III. Azo-derivatives of Menthyl Acetoacetate. By ARTHUR LAPWORTH 1114

CX.—Condensation of Phenols with Esters of Unsaturated Acids. Part VIII. By SIEGFRIED RUHEMANN . . . 1130

CXI.—Action of Phosphorus Trichloride on the Aromatic Ethers of Glycerol. Part II. By D. R. BOYD 1135

CXII.—Attempts to Prepare Isomeric Quaternary Salts. By MARMADUKE BARROWCLIFF and FREDERIC STANLEY KIPPING . 1141

CXIII.—Some Salts of *d*- and *l*-α-Phenylethylamines. By ALBERT EDWARD HUNTER and FREDERIC STANLEY KIPPING . 1147

CXIV.—β-Bromocinnamic Acids. By John J. SUDBOROUGH and KENWORTHY J. THOMPSON 1153

CXV.—Vapour Pressure of Aqueous Ammonia Solution. Part II. By EDGAR PHILIP PERMAN 1168

CXVI.—Isomeric Aminoamidines of the Naphthalene Series. (Fourth Communication on Anhydro-bases.) By RAPHAEL MELDOLA, F.R.S., JOHN VARGAS EYRE, and JOSEPH HENRY LANE 1185

CXVII.—Polythiosulphonic Acids of *p*-Diamines. By ARTHUR GEORGE GREEN and ARTHUR GEORGE PERKIN . . . 1201

CXVIII.—The Rotation of the Menthyl Esters of the Isomeric Chlorobenzoic Acids. By JULIUS B. COHEN and SAMUEL HENRY CLIFFORD BRIGGS 1213

CXIX.—The Action of Nitric Acid on Methyl Dimethylacetoacetate. By W. H. PERKIN, Ph.D., F.R.S. . . . 1217

CXX.—The Reaction between Phosphorus and Oxygen. Part I. By EDWARD JOHN RUSSELL 1263

CXXI.—Action of Hydrogen Peroxide on Carbohydrates in the presence of Ferrous Sulphate. IV. By ROBERT SELBY MORRELL and JAMES MURRAY CROFTS 1284

CXXII.—Ethyl Benzylideneanilineacetoacetate. By ROBERT SELBY MORRELL and ALBERT ERNEST BELLARS 1292

CXXIII.—Contributions to the Chemistry of the Terpenes. Part I. The Oxidation of Pinene with Chromyl Chloride. By GEORGE GERALD HENDERSON and THOMAS GRAY [and, in part, EWING SMITH, A.I.C.] 1299

CXXIV.—Studies on Enzyme Action. I. The Correlation of the Stereoisomeric α- and β-Glucosides with the corresponding Glucoses. By E. FRANKLAND ARMSTRONG (Salters' Company's Research Fellow) 1305

CXXV.—Studies of Dynamic Isomerism. I. The Mutarotation of Glucose. By T. MARTIN LOWRY, D.Sc. 1314

PAGE

CXXVI.—The Rotatory Power of Maldiamide, Maldi-*n*-propylamide, and Maldibenzylamide. By JOHN MCCRAE . . 1324

CXXVII.—The Constitution of Chrysophanic Acid and of Emodin. By HOOPER ALBERT DICKINSON JOWETT and CHARLES ETTY POTTER 1327

CXXVIII.—Additive Compounds of *s*-Trinitrobenzene and Alkylated Arylamines. By HAROLD HIBBERT and JOHN J. SUDBOROUGH 1334

CXXIX.—The Influence of Cyclic Radicles on Optical Activity: Tartaric *ar*- and *ac*-Tetrahydro-β-naphthylamides, Furfurylamide, and Piperidide. By PERCY FARADAY FRANKLAND and ERNEST ORMEROD, M.Sc. 1342

CXXX.—The Influence of Various Substituents on the Optical Activity of Tartramide. By PERCY FARADAY FRANKLAND and ARTHUR SLATOR, M.Sc., Ph.D. 1349

CXXXI.—Simplification of Zeisel's Method of Methoxyl and Ethoxyl Determinations. By W. H. PERKIN, Ph.D., F.R.S. 1367

CXXXII.—The Action of Benzamidine on Olefinic β-Diketones. By SIEGFRIED RUHEMANN 1371

CXXXIII.—Dissociation Constants of Trimethylenecarboxylic Acids. By WILLIAM A. BONE and CHARLES H. G. SPRANKLING 1378

CXXXIV.—The Elimination of Hydrogen Bromide from Bromo-*gem*-dimethylsuccinic Acid and from Bromotrimethylsuccinic Anhydride. By WILLIAM A. BONE and HERBERT HENSTOCK 1380

CXXXV.—The Formation of Urea by the Direct Hydrolysis of Lead Cyanate. By ALEXANDER CHARLES CUMMING, B.Sc., Kernot Research Scholar in the University of Melbourne . 1391

CXXXVI.—The Estimation of Hydroxylamine. By HUMPHREY OWEN JONES and FREDERICK WILLIAM CARPENTER . . 1394

CXXXVII.—A Study of the Isomerism and Optical Activity of Quinquevalent Nitrogen Compounds. By HUMPHREY OWEN JONES, M.A., B.Sc., Fellow of Clare College and Jacksonian Demonstrator in the University of Cambridge . 1400

CXXXVIII.—The Molecular Formulæ of Fused Salts as Determined by their Molecular Surface Energy. By J. FRANK BOTTOMLEY, Ph.D. 1421

CXXXIX.—Studies on Comparative Cryoscopy. Part I. The Fatty Acids and their Derivatives in Phenol Solution. By P. W. ROBERTSON, Sir George Grey Scholar . . . 1425

PAGE

CXL.—Acid Salts of Monobasic Acids. By Robert Crosbie Farmer, M.Sc., Ph.D. 1440

CXLI.—The Constitution of Certain Silicates. By Charles Simmonds, B.Sc. 1449

CXLII.—A Dynamical Study of the Friedel-Crafts Reaction. By Bertram D. Steele, D.Sc. 1470
